 !bookings essential!**

1. Belt Sander – sand the floor with the grain using 40 Grit Paper.
 (use heavier paper first if old flooring or sand the floor on 45 degree angle.)
2. At this time fill any holes or gaps with putty if necessary.
3. Once putty is dried using the belt sander – sand the floor with the grain,
 using 80 Grit Paper.
4. Edger – sand around the edges using the 80 Grit edger discs.
5. Scrape the corners where the edger does not reach using a floor scraper or
 by hand with sandpaper.
6. Polivac - using 120 Grit screenback, buff the floor. Ensure that all sanding
 marks from the belt sander are removed.
7. Vacuum floor thoroughly
8. Apply 1st coat of Gloss using a mohair roller for big areas and a brush for
 small hard to reach areas and around the edges. Place roller and brushes in
 solvent. Leave to dry minimum 8 hours.
9. Once dried, using a 220g screenback, buff the floor.
10. Vacuum once again very well. Apply 2nd coat of gloss to flooring.
11. Once dried, repeat steps 9 and 10 applying the final coat in your
 desired gloss level.
12. Enjoy your flooring!
13. Refer to our brochure on floor maintenance to keep it looking great!

Please note: Whilst this is a guide on how to sand and polish your flooring and as all floors are different,
 Marques Flooring does not take responsibility for the finish of your flooring. If you have any questions or
